# LOOK

## Look around.

The boardroom, break room, training room—each space has its own purpose, why not its own LOOK? With LOOK's clean-cut appearance and value-oriented family of chairs, each room can express its unique personality and still look good with everything else.

Seating

# Look

---

LOOK's great appearance will make the first impression, but its simplified ergonomics will carry the good feelings through the day. Adjustments that are usually only found on higher-end task chairs are standard on LOOK, plus many optional adjustments are available for task-intensive users. So take a seat. You'll never look or feel so good for so little.
