

HAWORTH®

Planes®

Tables and Conference Solutions

Beautifully simple and thoughtfully designed, Planes will change the way you look at collaborative spaces. Its clean, linear design allows for more than 80,000 distinct combinations to suit your objectives and aesthetic. And with a multi-faceted family of tables, credenzas, and more, Planes provides unparalleled breadth and flexibility to create exactly the environment you need.

Designed as part of the global Haworth platform, Planes integrates seamlessly with our systems furniture, moveable walls, casegoods, and architectural elements. From its human-scaled dimensions to the materials and finishes, Planes effortlessly brings greater continuity to any space. Created by Haworth Design Studio and Daniel Figueroa of Bad Munder, Germany, Planes answers a global appeal for crisp, clean design.

A complete environment.

At the core of the collection is the Planes table — a sleek, ideally proportioned design with options that appeal to virtually every taste and personality.

From a sophisticated, formal air to something more contemporary and athletic, Planes offers the right shapes, scale, and finishes to enhance every space. But Planes extends far beyond tables. Multiple credenza and cart options, a coordinating podium, easels, information boards, and even an integrated horizontal wall rail system contribute to a consistent, expertly outfitted environment.

From a single table to a fully furnished conference or multipurpose room, Planes makes an impeccable, professional impression within any budget.

Entirely responsive.

Planes is designed as a kit of interchangeable parts. Arranged tables in a V for a speaker at 10 a.m., shift to a conference table over lunch, then create a collaborative atmosphere by early afternoon. The same room and furnishings can change shape in just minutes.

Helpful features make Planes technology and user friendly. One-touch flip-top power units come in a variety of configurations. Cables stay out of sight, integrated into the table base and stretched down the Y-Leg.

In addition, hidden doors conceal cables and storage. The light-weight podium and carts can be pulled where needed. And the Planes easel accommodates writable information boards that also hang on the horizontal wall rail system. The list goes on and on.

Inspiring functionality.

Planes is the office workhorse. Specifically designed to support the needs of business and technology today, Planes encourages users to:

Configure. Create a variety of collaborative environments to support any application.

Adjust. Choose from a variety of height-adjustable mechanisms: incremental, crank, torsion, and electric.

Plug In. Choose the built-in power and communication options that make sense for the space.

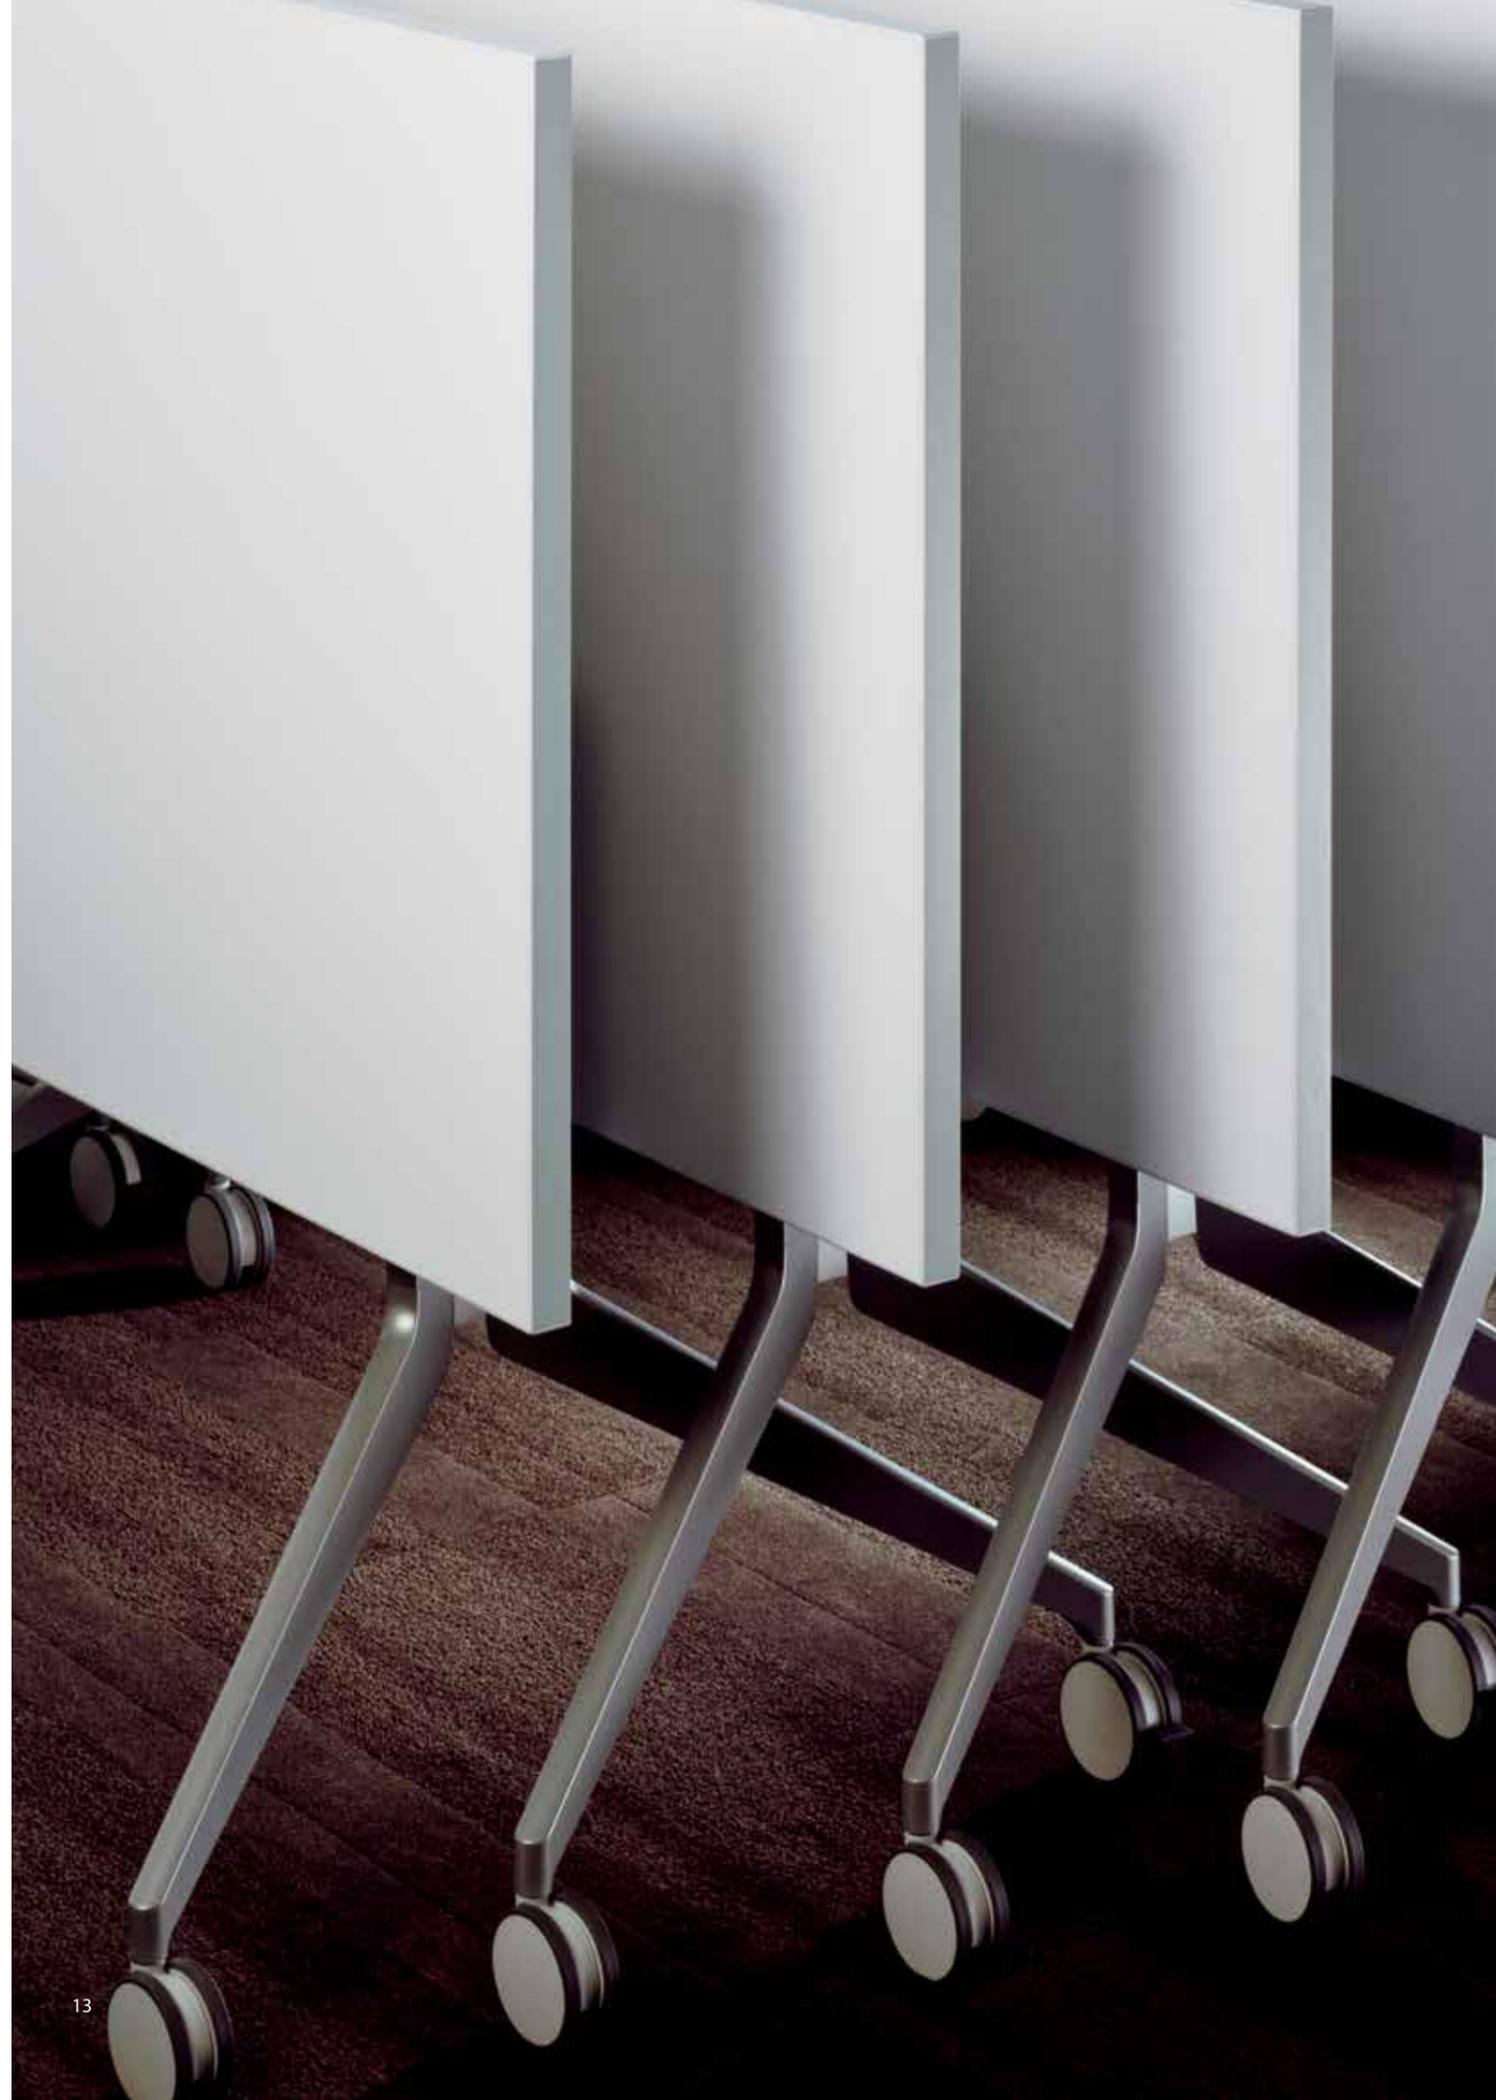

Flip. Use, move, or stow the flip-top mobile tables in a snap.

Store. Flip up the pneumatic Y-Leg table with its ergonomic finger pull, then nest to save space. Finished on both sides, Planes tables can be stored in plain view.

Conceal. Keep wires contained, connected, and out of sight.

Specify. Choose the top shape, edge profile, leg style, core, and finish. Planes tables are offered in six-inch increments.

Intuit. Enjoy logical, clear functionality that anyone can master in seconds.

Great alone. Better together.™

Planes has a crisp, clean and efficient design that could easily be integrated with other product ranges within the Haworth family. The product is highly adaptable to the workspace environment, as well as the surrounding architecture. It's one more way Haworth helps you create spaces that perform beautifully today, and adapt easily to changes down the road.

In addition, Planes' far-ranging materials, finishes, and glass offerings integrate seamlessly with other Haworth lines. From high-end, formal conference rooms to roll-up-the-sleeves meeting spaces, Planes makes it easy to apply a uniform aesthetic throughout the landscape. Create consistency from walls and systems to tables and beyond.

Attentively detailed.

Planes incorporates aesthetic and functional details to enhance design freedom and user convenience. From technology-friendly features such as a cable base that neatly manages wires and one-touch flip-top power units, to a height-adjustable table that hides the crossbar under the table top. Planes delivers new ideas to collaborative spaces.

The breadth of the Planes collection allows tremendous flexibility to support any application. Draw on tables, credenzas, media carts, podiums, and more to create a fully adaptable space that conforms to your aesthetic. From sophisticated, formal conference rooms to athletic multi-purpose environments, choose precisely the Planes elements, finishes, and options you need.

1600D *1600W

Cable Base

Route and conceal cables through a center base. Side doors allow easy access, and an interior cleat manages wires neatly.

Cable Base
350D*200W
350D*350W

Credenza

Sizes integrate seamlessly with the dimensions of other Haworth product lines. Clean alignment encourages use in multiples.

Catering Cart

Lightweight with built-in handles and matching casters for easy mobility. Available in laminate, and designed to integrate with Planes elements and other products.

Media Cart

Stows a projector beneath the laptop tray. A false back door provides access to concealed cables, while a front door hides a storage shelf. Locking doors make it easy to move from room to room.

* Note: All dimensions in mm

Cart Podium

Cabinet, shelf, and a false front provide optimum storage of papers, a computer, and cables.

Small Cart

Designed to hold a phone or remote controls within arm's reach, or magazines in a lounge area. The cabinet, with its adjustable shelf, allows infrequently-used items to be stored out of sight.

Single and Double Easel

Accommodates information boards that also hang on the horizontal wall rail system. All surfaces are writeable.

Discussion table

Wood veneer and HPL worktop to choose. Choose casters or glides for easy mobility, and switch them if you change your mind later. Transform space into places for casual meeting or entire social scenes with thoughtful cable management solution.

Round
850/900/1000 Dia

Training Table

Planes Training Tables are optimized for the Presentation mode, but will be able to provide solutions for different training scenarios. From straight lines of rectangles to U shapes with Pie Connectors, traditional training room typicals can be created. However, with clustering rectangles or using other shapes, other collaborative modes can be addressed.
