

AP Planes Training Table

AP Planes Training Table

Product Sheet

An Effective & Flexible for Training and Learning Space

Planes Training Table, an extension of Planes family catering for learning space. The table comes with a new C-Leg design, straight forward cable management for effective leg room space, configuration and nesting capability.

This table also strengthens Planes as a comprehensive table platform when use with other Planes products, such as carts, podium and Integrated Palette

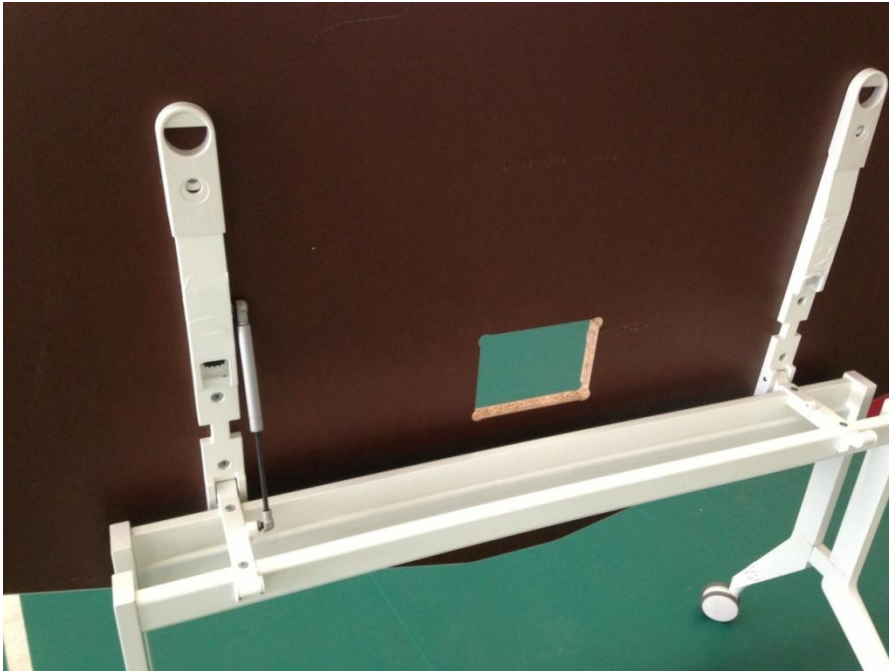

AP Planes Training Table - Typical Application

AP Planes Training Table

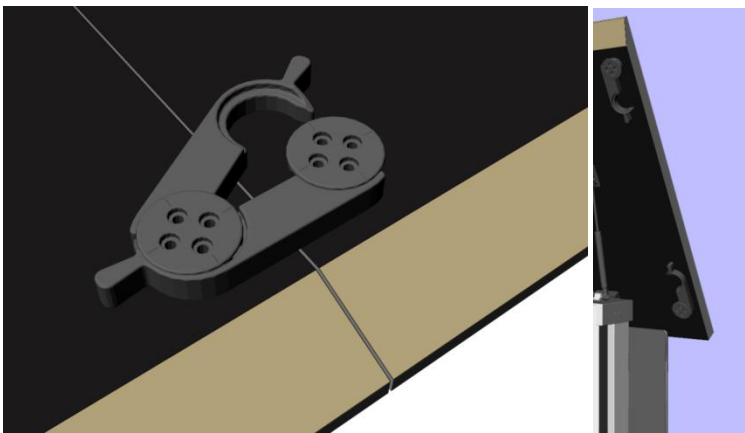

New Flip Top Mechanism

- Flip top mechanism allows easy access to new power distribution systems
- More space for increased cable capacity
- Nesting capability to save space
- Enables service part tops to be sold without the subassembly

Plastic Ganging Clip

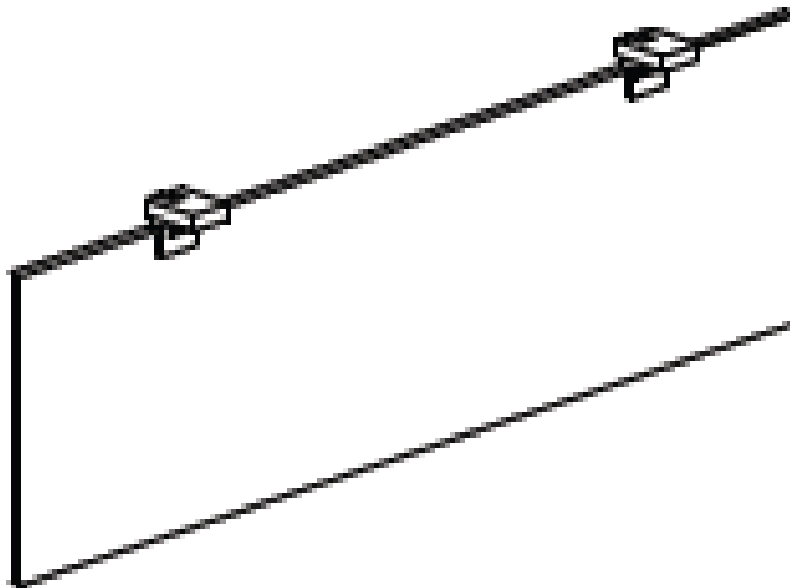

- New ganging mechanism, user-friendly, no tools required
- Recommend 4 per table
- Required for tables with power distribution systems

AP Planes Training Table

Modesty Panel

- Fabric, LPL and HPL are available
- Hinged bracket - modesty panel stays on when table is nesting and also deflects on impact.
- Can be removed without tools for replacement or retrofit.
- Fabric will be railroad orientation to enable full length statement of line.

AP Planes Training Table
