

# Audience Conference

### Conferencing rooms connected to technology

Similar to a fingerprint, a conference table is unique. Audience is a program "a la carte" offering a customized answer to each conference space: integrated technology, functionality and image are foremost in our design.

Audience boasts a heritage of more than 60 years in top-of-the-range veneer work.

It offers a wide range of finishes and shapes: rectangular, elliptical, boat, U-shaped, round and square. In addition, ancillary storage, multi-media furniture and a lectern complete the range.

The use of high technology is not a constraint anymore; it is now perfectly integrated, discreet and intuitive. Both speaker and audience gain in serenity and efficiency.

Design Albert Holz.

Mirror technique projection system folds away invisibly to leave a clear line of vision.

"It is simple elegance that charms us".

Ovid

The experts will recognize Charles Eames homage and 60s design references in the legs' characteristics.

Videoconference – Bringing people together across challenging distances. Reducing business travel's impact on the environment.

Rotating power socket

Lectern with integrated technology. The speaker doesn't have to take care of technical details but stays focused on his meeting.

Long conferencing table catering for large team discussion.

**Mediacar for projection**

It may include a central unit, a video projector and also hold a laptop horizontally. This mobile and versatile item of furniture follows the speaker's movement.

From storage to electrification, everything has been thought of to marry elegance and functionality.

Vertically retractable power socket  
(Note: EU socket shown)

Walnut, oak, cherry, maple... veneers are selected carefully and are sourced from sustainably managed forests where the environment is respected and its renewal looked after.

Sideboard – More than a storage solution, the sideboard is a personal and refined creation that humanises the professional atmosphere.

**Mediacar, the speaker's collaborator**

Mediacar for projector and laptop to facilitate conferencing.
