HAWORTH®

## **b\_sit**

The sled base chair, one of the most influential architectural developments of the Bauhaus period, has been reinterpreted with b\_sit. Instead of a circular tube, the chair has a rectangular profile which – together with the upholstered seat shell – result in a formal entity of high value and comfort. b\_sit is prestigious and refined, combining aesthetics and functionality.

Design: Martin Ballendat

b\_sit harmonises with its surroundings and supports the user, providing the ability to enhance concentration and provide relaxing comfort in a demanding environment. The harmony of high-quality workmanship and materials form an unmistakable unity.

The unusual lines reflect the functional and ergonomic design of the chair. The lumbar region is specifically supported, the armrests offer support without restricting the freedom of movement. The base relieves the spinal column. An entirely harmonised design, timeless and individual.
