

Realm Pod

collaborative seating by Fletcher Systems

Originally designed as concept seating for Hoyts Cinemas in 2006. The POD design provides a secluded private space within office environments, breakout areas, libraries, public spaces and airports. The acoustic qualities allow you to take timeout, to read, think, check your emails or even take a nap. Or put two PODS face to face to create a one-on-one private meeting space.

Realm Double Sided

collaborative seating by Fletcher Systems

Another hybrid of the successful modular Landscape ranges, Realm consists of high and low back double sided segments and an ottoman. By duplicating and grouping the segments, seating plans with a sculptural aesthetic can be created. Ideal for high traffic commercial environments such as stand alone café/restaurants and public spaces.
